

Clinical AI

Software that reads your X-rays for caries, bone loss, and pathology, and shows patients what you see. New to the category? Ask Mola — our assistant at search.dentaltechhub.com — to shortlist vendors for you first.

WHAT TO ASK ON A DEMO

TICK WHAT THEY SAY · NOTE · N/A

01 Is it FDA-cleared, and for which findings exactly?

Doesn't apply

"Cleared" is vague — caries, bone loss, and pathology aren't one clearance.

- All three findings
- Some findings only
- Not cleared

NOTES

02 How accurate is it, and what's the evidence?

Doesn't apply

Ask for published validation, not just a clearance or a sales claim.

- Published studies
- Internal data only
- Couldn't say

NOTES

03 Does it read 3D CBCT, or only 2D X-rays?

Doesn't apply

Not all read CBCT natively; matters if you do implant work in-house.

- 2D only
- 2D + 3D CBCT

NOTES

04 Can I overrule it and adjust how sensitive it is?

Doesn't apply

You're the diagnostician — false flags in front of a patient erode trust.

- Full control
- Limited control
- No / unclear

NOTES

05 **Can I watch a patient see the findings chairside?**

Doesn't apply

The case-acceptance payoff lives here, not in back-office reports.

- Live patient view
- Report only

NOTES

06 **Does reading add time to the exam?**

Doesn't apply

A tool that slows a busy operator won't get used; ask how it fits.

- No added time
- Adds a step
- Unclear

NOTES

07 **How does it write into my PMS and imaging?**

Doesn't apply

Write-back vs. a separate dashboard is a real daily difference.

- Full write-back
- Read-only sync
- Standalone

NOTES

08 **Where do my images go, and who can use them?**

Doesn't apply

Cloud storage is normal — ask about a BAA and whether your data trains their AI.

- BAA, not for training
- Used for training
- Unclear

NOTES

09 **One focused tool, or a platform with bolt-ons?**

Doesn't apply

Don't pay for verification, scribing, and analytics you won't use.

- Focused tool
- Platform + bolt-ons

NOTES

10 **How is it priced for a practice my size?**

Doesn't apply

Pricing is rarely public; get the billing model in writing.

- Per provider
- Per location
- Per scan

NOTES
